Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering
Assam Down Town University | Expected Graduation: 2028 | **CGPA: 9.05**
Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence & Machine Learning, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

Achievements

- Founded and launched two production-ready platforms with live deployments.
- Built and deployed full-stack applications used for database management, coding assessments, and marketplaces.

Technical Skills

- **Programming Languages:** Java, Python, JavaScript, TypeScript, SQL
- **AIML:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Data Preprocessing, EDA, Data Visualization, Feature Engineering, Machine Learning, Model Training & Evaluation, Classification, Regression, Clustering, Basic Deep Learning
- **Full-Stack Development:** React.js, Next.js, Tailwind CSS, Node.js, Express.js, REST APIs, WebSockets (Socket.io), Flutter, Responsive UI Design
- **Databases:** MongoDB, MySQL, PostgreSQL, Firebase Firestore, Redis
- **Cloud & DevOps:** Docker, Vercel, Render, Firebase, Cloudinary, CI/CD, Deployment
- **Desktop Development:** Electron.js, Cross-Platform Application Development
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Figma, Canva

Experience / Startup

ZiuroDB - Founder & Full-Stack Developer

- Built a modern database management platform supporting MongoDB, MySQL, PostgreSQL, Firebase, Supabase etc. enabling centralized database administration, query execution, and monitoring through a single interface.
- Database-to-REST API Engine: Developed an API gateway that dynamically exposes database connections as secure, rate-limited REST endpoints supporting SQL transactions and query batching.
- Ziuro-AI: Integrated an AI-powered assistant that helps users analyze, understand, query, and manage their database data using natural-language interactions.
- ZQL (Ziuro Query Language): Developed a universal query language designed to work across different database systems, providing a consistent query interface regardless of the underlying database.
- npm Package: Developed the ZiuroDB npm package/SDK, enabling developers to integrate ZiuroDB features and database operations directly into their Node.js applications.
- Tech Stack: React, TypeScript, Electron, Tailwind CSS, Node.js, Express.js, MongoDB, MySQL, PostgreSQL, Socket.io, Docker, BullMQ, Redis, Firebase, Cloudinary, Vercel.
- **GitHub:** <https://github.com/ziurodb> **Live Demo:** <https://www.ziurodb.com>

Software Projects

ZiuroCoding - A Coding Test Platform

- Developed a full-stack coding assessment platform for conducting secure, timed programming tests with Monaco Editor and support for Java, C++, and Python.
- Implemented a scalable Redis + Bull queue-based execution system for concurrent code execution with isolation and time limits.
- Developed features such as JWT authentication, anti-cheating mechanisms, real-time leaderboards, section-wise assessments, and progress tracking.
- Created an admin dashboard to manage users, questions, sections, submissions, and results.
- **Tech Stack:** React (Vite), Tailwind CSS, Node.js, Express.js, MongoDB, Socket.io, Redis, Bull Queue, JWT, Monaco Editor, Java, C++, Python, Docker/Native Execution.
- **GitHub:** <https://github.com/ziurocoding> **Live Demo:** <https://coding.ziuro.com>

AI & Development:

Prompt Engineering, AI-Assisted Development, LLM Integration
